Auto bidding

How to place an automatic bid?

In an auto bid, the user specifies their maximum price for the lot. The auction system ensures that, when outbid by another party, the minimum possible increment is placed on behalf of the user, as long as the user's maximum price has not been reached. The user can remove an auto bid by simply placing a static bid that becomes the highest bid at that moment.

Use the specific autobid text field to use this feature.
